Subject: Application for a Full-Stack Developer Position

Dear Hiring Manager,

I am writing to apply for a Full-Stack Developer position at [Company Name]. I am a fourth-year student at Dire Dawa University with a strong interest in building practical web applications and developing my skills across the frontend and backend.

One project that represents my practical experience is **Construction Gebya**, a digital marketplace concept for the construction sector. It is designed to connect contractors, suppliers, and transporters through an auction-based workflow. The project has strengthened my understanding of how to translate a real-world problem into an application with multiple user groups and connected workflows.

My current technical toolkit includes **TypeScript, Node.js, PostgreSQL, and Docker**. I am motivated to keep improving my ability to build reliable features, work with databases and backend services, and contribute to well-structured software projects. I value clear communication, collaboration, and learning through practical work.

I would appreciate the opportunity to bring my enthusiasm and developing technical skills to [Company Name]. I am ready to learn, accept feedback, and contribute responsibly to the team's goals. Thank you for your time and consideration. I look forward to the possibility of discussing my application with you.

Sincerely,
Wendayew Fkadu
